Achieve the same results as a walk-behind aerator with even greater productivity and reduced operator fatigue with the Easy-Core 116. With a great capacity and operating speed, you'll aerate more, aerate better and have energy to spare.

When aerating wide open spaces like athletic fields or heavily landscaped areas, such as large commercial or residential properties, Easy-Core 116 should be your choice.

By comparing productivity, core spacing and core depth to your existing weighted rotating pull behind, you'll see why Easy-Core 116 makes sense for turf care professionals who want great results without sacrificing productivity.
