FOR

The redesigned self-propelled Rink 1015 has a large working width of 59" (1.5 m), what enables it to cover an area in a minimal amount of time. It's stainless aluminum steel hopper has a capacity of 18 cu ft (0.5 cu m) when filled level at the top of the hopper. The strong 13 hp Honda engine enables it to cover large areas quickly, while the 1015's 4 large tires are pivoting, so that ground contours are followed smoothly.

RINK TOP DRESSER 1015

WORKING SPECIFICATIONS

Working width	59" (150 cm)
Hopper capacity:	18 cu ft (0.5 cu m) level at top of hopper
