

ARTIFICIAL TURF

To brush, loosen and decompact the hardest infill, the Verti-Groom is equipped with a variety of interchangeable tools. The spring steel flexible tines gently lift and break up compacted areas while effectively mixing and incorporating sand infill. Mounted separately or with the spring tines, specially configured rear poly brushes straighten and lift the turf fibers leaving them in a plush and upright for a soft and level playing surface.

VERTI-GROOM

Redexim North America are respected world wide for their knowledge of natural turf maintenance, particularly with regard to aerating using the Verti-Drain. After many years of development Redexim North America have produced a complete range of machines for the maintenance of Artificial Turf, called the Verti-Art range. Many people believe that once installed artificial turf will "look after itself," this is far from the reality. Just like natural turf needs regular mowing and aerating to maintain healthy growth and appearance, so artificial turf whether granulate filled or fully synthetic require cleaning and levelling of the granulate which can accumulate in some areas while leaving others without.

| SPECIFICATIONS | Weight: | 495 lbs. (225 kg) |
|----------------|----------------|--|
| | Working Width: | 80" (2,000 mm) |
| IFIC | 3-point type: | Cat-1 |
| PEC | Rec. Tractor: | 18 HP |
| WORKING S | Depth: | 0-1.2" (0-30 mm) |
| | Options | Multiple poly brushes, single or multiple spring tine rows Magnetic sweeper bar Tow-behind kit |

| | FEATURE | BENEFIT |
|---------------------|--------------------------------|--|
| ITS | Gentle spring steel tines | Breaks up and levels compaction quickly |
| ENEF | Adjustable working depth | Protects the backing material |
| FEATURES / BENEFITS | Reduces surface hardness | More natural feel, may reduce injuries |
| TURE | Increases water percolation | For fast drainage and fewer wet areas |
| FEA | Special rear brush arrangement | Levels infill leaving field ready for play |
