

# A E R A T I O N

# VERT-DRILL

The innovative Verti-Drill system will fit all new and existing Verti-Drain machines utilizing the standard tine heads. This unique system will relieve compacted areas and greatly improve drainage at speeds up to 7 times faster than other drilling systems, all without pulling a core that would later need to be collected. During penetration, the drill spins freely into the ground. The gentle drill action cleanly slices through the turf, reducing turf healing time and allowing play to resume quickly.

# VERTI-DRILL

Upon removal, the patent pending Verti-Drill mechanism locks the drill tine from rotating and all material in the drill grooves is removed. This loose material can then be easily dragged back into the turf. Verti-Drills are available in drill diameters from 1/2" to 3/4", with working length of 10".

## WORKING SPECIFICATIONS

1/2" x 10" with 1/2" shank

5/8" x 10" with 1/2" shank

3/4" x 10" with 3/4" shank

## FEATURES / BENEFITS

FEATURE	BENEFIT
Fits all 10" and deeper Verti-Drains	Easily Adaptable
7 X faster than other drilling systems	Higher productivity
Does not pull a core	Fast Cleanup
1/2" to 3/4" diameter x 10" depth	Choice of tines for varying conditions
Pulls organic microbes to surface	Removal of thatch layer
